Lectra continues international growth

Paris, June 13, 2007 – Within the framework of its international development, Lectra is pleased to announce the opening of its new headquarters in Munich as well as a new office in Greengates, near Leeds, England.

The new Munich headquarters for German clients and Eastern European countries

The growth recorded by the Eastern European countries (Poland, Romania, Croatia, Czech Republic and Russia) and by the German subsidiary, in charge of the region's coordination, has prompted Lectra to move its Munich headquarters. The new, more spacious premises include training rooms as well as an area for demonstrating Lectra solutions and machines, which will make it possible to accommodate customers and prospects from the whole region. As a result, customers and prospects will be able to discover all the solutions by attending presentations, topical seminars or even workshops.
