Women's wear

CHALLENGE

Accelerating the pattern construction process while improving the precision of pattern pieces

LECTRA SOLUTION

Modaris ExpertPro, part of the Modaris® range

BENEFITS

More structured patterns and collections
Improved quality
Greater productivity
Innovation developed

“The new version of Modaris ExpertPro really helps us save time. There are so many advantages to working with it. The dependencies concept in V6R1 is invaluable for accelerating processes and maintaining a high level of precision.

We are also impressed by the fact that the lengths for zippers, slits, etc... can be graded directly from the measurement table. This has eliminated tedious verification tasks, and the lengths per size appear in the table.

What's more, the new parameter for symmetrical corners enables hems to be produced with double folds. This is also very useful for us; with previous versions we could get to the same result but needed to make a construction with extra lines. Perpendicular corners can also be linked to each other: even after modifying one sleeve, the other will be modified accordingly. These functions really make a difference!”

*Claude Ampe,
Head of Sourcing and Production, Andres (Belgium)*

Belgian women's wear manufacturer, Andres, produce high-quality garments under a number of brand names, including xandres and Hampton Bays. Each collection they produce includes a complete look of coats, blazers, blouses, trousers, sweaters, t-shirts, and accessories. They pride themselves on their attention to detail and the excellent finishing on their products. The elegance of their creations is clearly the key to their success.

Since their inception over 40 years ago, this family company has dressed three different generations of women. In 2003, the company created new lines that are still being developed—xandres golf and xandres x-line, a range of clothes for fuller-bodied women. With a number of retail outlets worldwide, the company envisages opening its own boutiques in the future.

ABOUT LECTRA

Lectra is the world leader in integrated technology solutions that automate, streamline, and accelerate product design, development, and manufacturing processes for industries using soft materials. Lectra develops the most advanced specialized software and cutting systems and provides associated services to a broad array of markets including fashion (apparel, accessories, footwear), automotive (car seats and interiors, airbags), furniture, as well as a wide variety of other market sectors, such as the aeronautical and marine industries, wind power, personal protective equipment. Lectra serves 23,000 customers in more than 100 countries with 1,500 employees. The company is listed on Euronext Paris.
