

How to boost your manufacturing performance

01

MAXIMIZE UPTIME

Invest in innovative cutting equipment designed to deliver the highest possible uptime.

Preventive maintenance planned and managed by trained experts ensures maximum availability of leather-cutting equipment throughout production.

30% Industry Trend:

Much of the equipment in factories runs at 30% capacity or less.

Industry Trend:

Making the shift to advanced analytics can result in 25% productivity increase and 45% reduction in downtime.

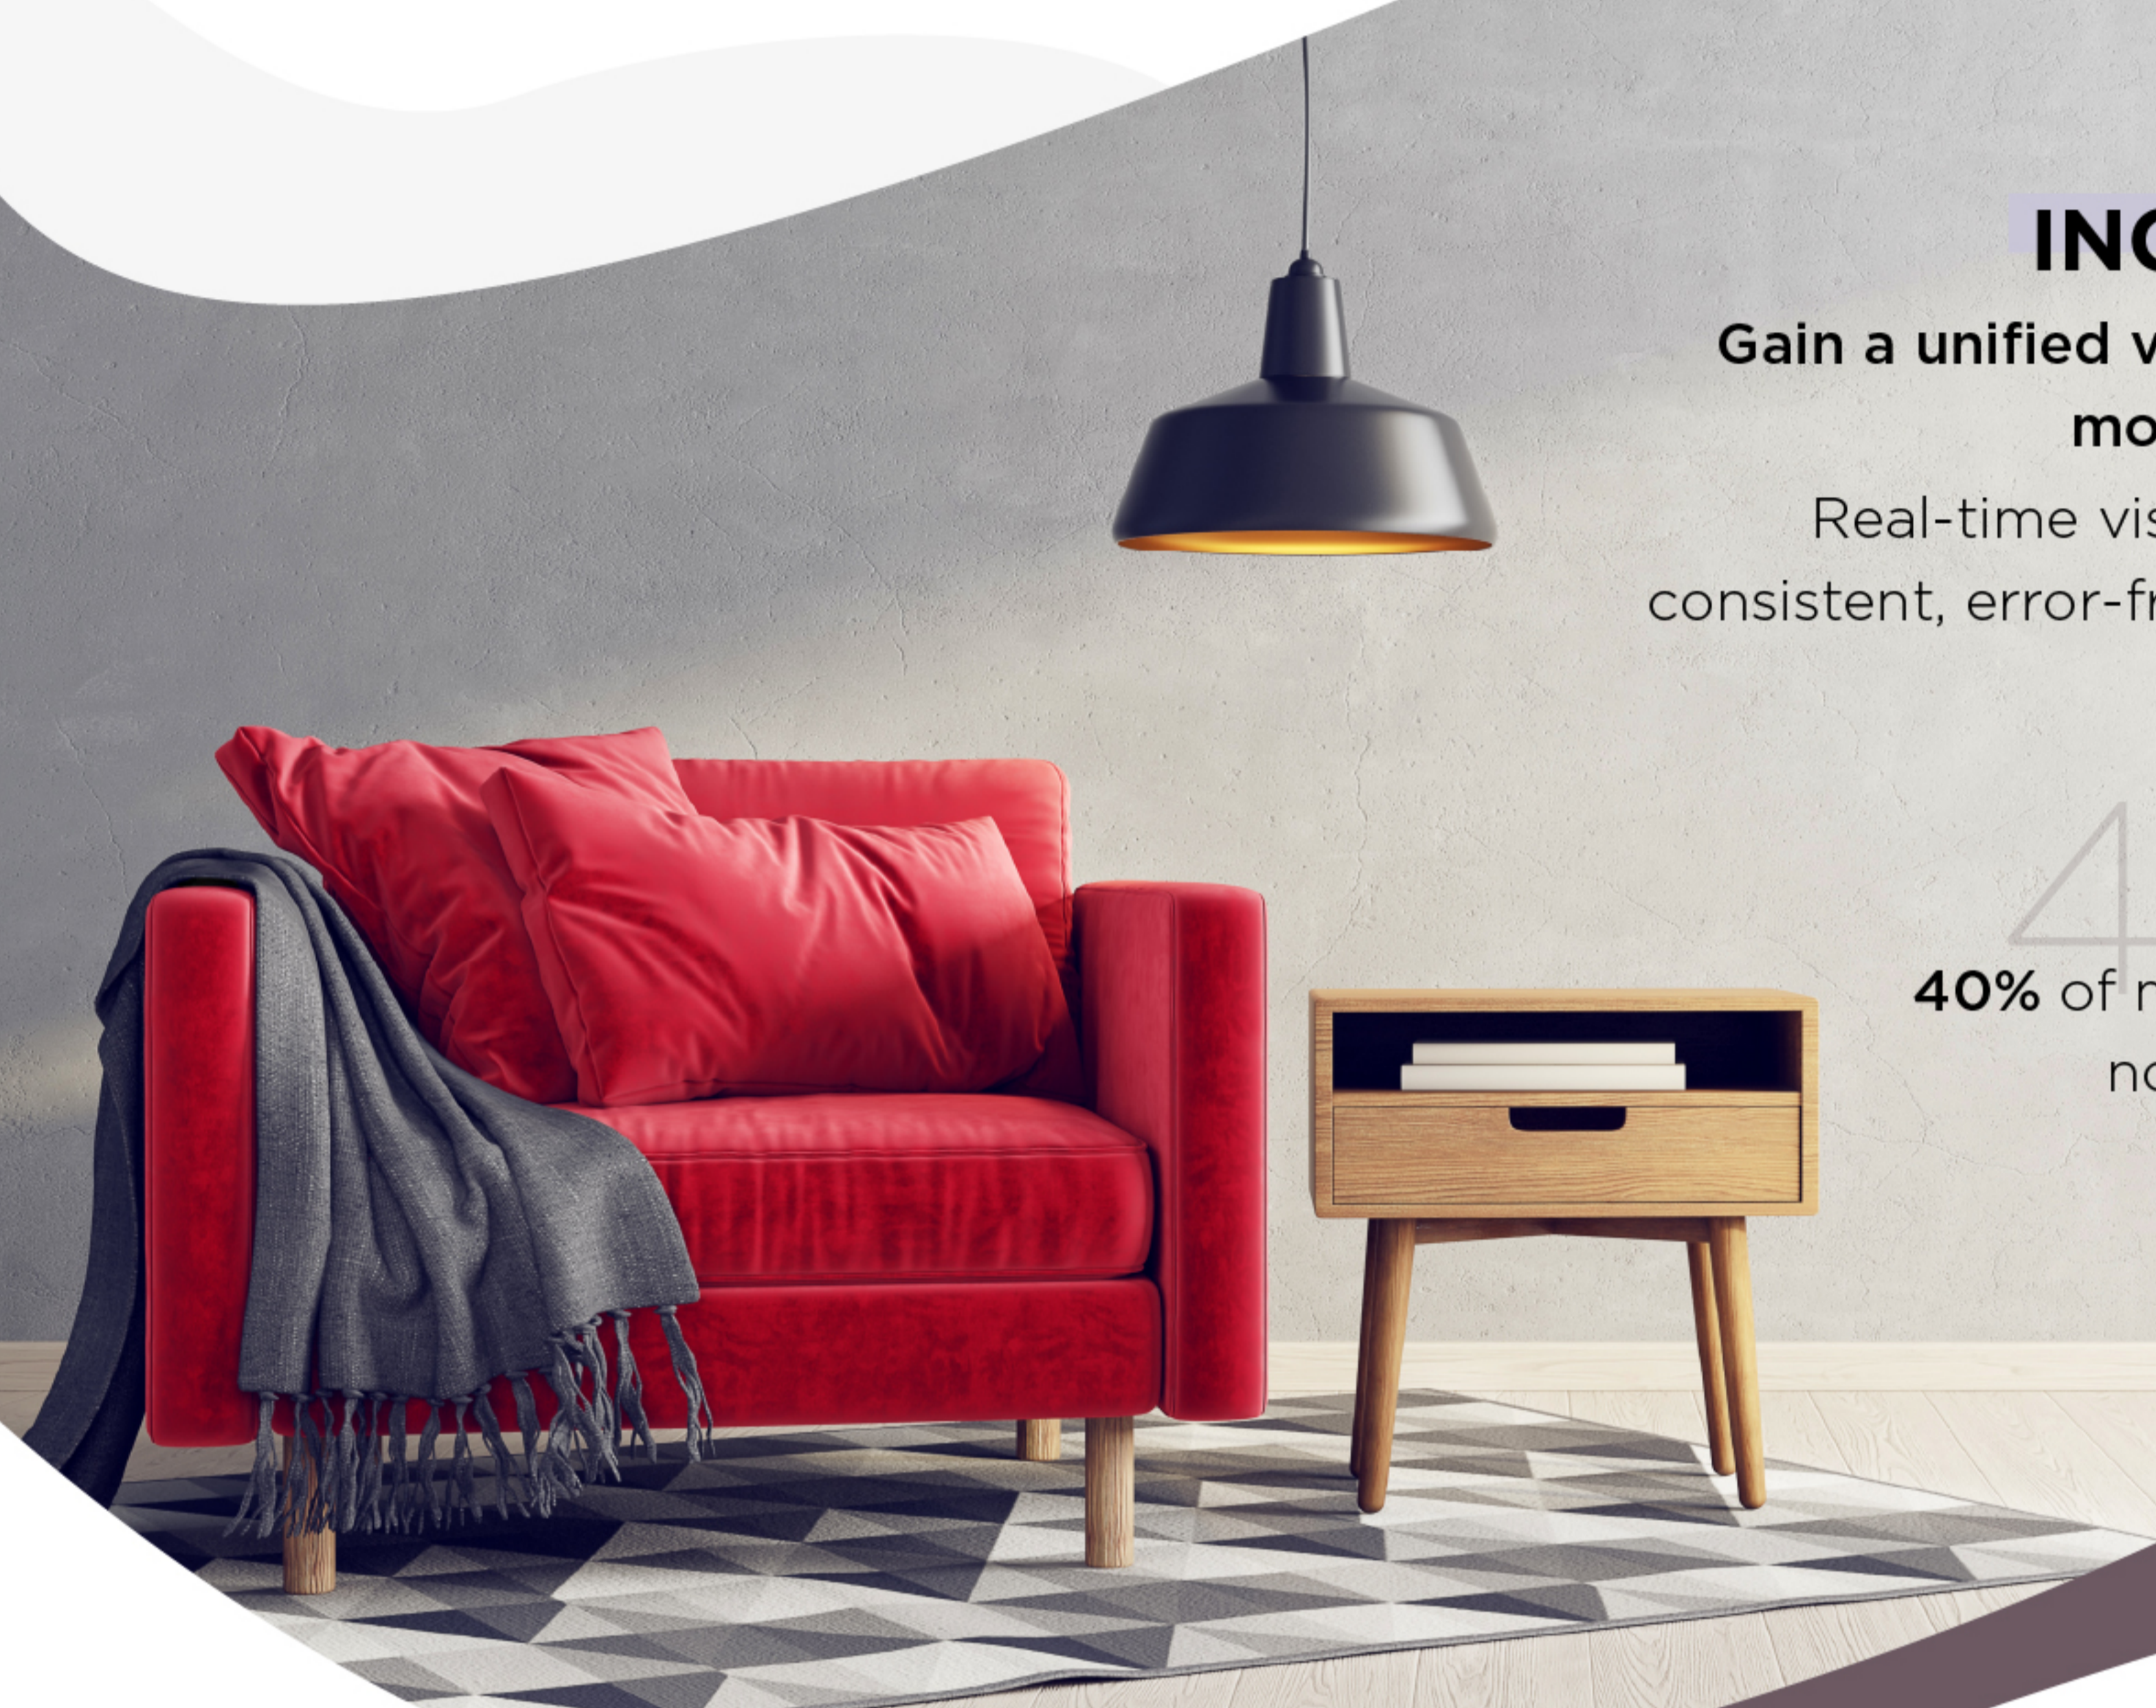

02

INCREASE VISIBILITY

Gain a unified view of manufacturing data to monitor the production process.

Real-time visibility of operations ensures a consistent, error-free data flow between people, processes and technologies.

40% Industry Trend:
40% of manufacturers have no real-time visibility

03

STRENGTHEN COMMUNICATION

Switch to a more efficient and collaborative way of working.

Communicate product designs within different areas of the company and with external collaborators to avoid errors, reduce waste and improve productivity.

Industry Trend:

Close collaboration with suppliers can yield cost savings of 5 to 10% and revenue gains of 7 to 10%*

04

CONTROL DESIGN COSTS

Minimize time-consuming, costly design iterations and physical prototypes.

Advanced 3D virtual prototyping solutions enable manufacturers to reduce the number of physical prototypes and pattern-making iterations by up to 50%, which can represent a savings of thousands of euros per prototype

50% Industry Trend:
50% of large industrial companies will use virtual prototypes by 2021

05

ACCELERATES THE PRODUCT DEVELOPMENT PROCESS

Embrace automation and cloud-based technology

Develop new furniture models faster. Simplify furniture patternmaking and optimize material management to minimize waste and shorten production cycles.

Industry Trend:

70% of manufacturers report cloud-based productivity applications report it has helped them respond to customer needs

Unlock the full production potential of your cutting room

Discover how you can integrate 4.0 technology and unleash productivity and profitability with Lectra's digital expertise.
